Our Solutions:

Pressure, Level, Flow,
 Temperature, Vibration,
 Turbine, Generator, Control,
 Fire system, Pneumatic,
 Hydrolic, Electrical, HVAC,
 Electronic, Mechanical,
 Safety, etc.

PREFACE

Welcome to
PLC TECHNOLOGY LTD.

(Process Logic Control Technology) is a leading, high-efficient solution provider for industrial automation, instrument solution and control technology. We focus on import, sales & service. We deal with worldwide top quality Branded Company for our clients. We also supply all kind of industrial accessories like safety equipments, instrumental & automation items, electro-mechanical items etc. as per client's requirements. We have a highly trained team for efficient solutions and provide hands on training to different level. We can assure about our efforts and sincerity that we will give you satisfactory outcome through our attention and diligence.

Industrial Training

OUR MOTTO

Customer's requirement is our first priority. Hence, we always committed to fulfill our customers demand with our dedicated experts consultancy. To ensure quality and reliability we share our experience with users so that user can understand the system difficulties and challenges which make user more confident about system. We comply with ISO 9001: 2015 regulations for betterment of our service and solutions.

MCC Assembly & Troubleshooting

Machine Health Check Up

Instrument Supply & Service

Smart Transmitter Solution

Our Low-voltage Apparatus :

PLC, HMI, DCS, SCADA, Sensor, Smart Transmitter, Isolator, Control valve, Positioner magnetic Contactor, Circuit Breaker, RCCB, Relay, Fan, Power Supply,

OUR SOLUTIONS

PLC TECHNOLOGY LTD.

offers perfect industrial process automation solution and equipment.

Since its inception, as an outstanding industrial automation company, with the imperative solution provider this company carried out jobs in different process plants and industries. We have a vast experience in executing projects for industrial process automation, modification/up gradation for old machineries (converting old systems into latest technology), installation, repairing, training, trouble-shooting and maintenance, in all the major process area like Power Plant, Pharmaceutical Industry, Fertilizers, Spinning, Knitting, Dyeing, Finishing, ETP, Refineries & Petro-Chemicals, Steel, Chemicals & many more industries throughout Bangladesh & abroad.

- Overhauling contract.
- Supply of tools and spares.
- Supply of quality manpower.
- Power station based technical training.
- Technical solution in proper selection of spares.
- Equipment troubleshooting and maintenance contract.
- Rotating equipment alignment and bearing correction.
- Steam and Gas turbine, 0.4 KV~6.6 KV motor driven pump.
- Fire fighting system installation, testing and commissioning.
- Supply and services of MOV, control valve, actuator and any kind of valves.
- Bearings, Lubrication system, Multistage pump, turbine operation and maintenance.
- Selection of engineering documents and helping the clients by guiding them what they actually require.
- Having good communication with international manufacturer we can provide spares as per specification especially all kind of power plant works.
- Trouble-Shooting, Programming, Commissioning of Auto-Control System. (PLC, HMI, Plant MIS, DCS etc.)
- Commissioning of substation, Installation and calibration of field instruments.
- Retrofitting, Up Gradation & Modernization of Control Systems for existing / Old Machinery & Plants.
- HVAC installation and troubleshooting, Commissioning and Services for existing / new Imported / second hand imported Machineries for Textile Industries.

Calibration Service

Measuring Solution

Field Sensor & Controllers

Fire Fighting Sensor & Controllers

PLC, HMI, DCS, SCADA Solutions

Encoder, Selector Switch, Temperature Controller, Timer, Counter, Battery, Connecting Cable, Safety Controls, Push Buttons, capacitor, signal light, etc.
